

Higher Eyes in the Sky: The Feasibility of Moving AWACS and JSTARS Functions into Space

Filesize: 1.11 MB

Reviews

Extensive information for book fanatics. Better than ever, though I am quite late in starting reading this one. I am just delighted to tell you that this is basically the best PDF I actually have gone through within my personal daily life and might be the greatest PDF for actually.

Biblioscholar Sep 2012, 2012. Taschenbuch. Book Condition: Neu. 246x189x4 mm. This item is printed on demand - Print on Demand Neuware - During the past few years, United States Air Force (USAF) leaders have begun to emphasize space operations. Global Engagement: A Vision for the 21st Century Air Force states that we will eventually transition from an air and space force into a space and air force and various leaders have opined that that air and space are seamless. Gen Ronald R. Fogleman, USAF chief of staff, introduced the concept that in the future, we will be able to 'find, fix, target, track, and engage (F2T2E)' any target, anywhere on the earth. In order to accomplish F2T2E, the functions performed by the E-3 airborne warning and control system (AWACS) and the E-8 joint surveillance, target attack radar system (JSTARS) will need to migrate to space-based platforms. This study explores how such a migration would occur. Before examining space operations, the historical military need for moving tar-get indicators (MTI) is examined, tracing the evolution from hot air balloons to our current AWACS and JSTARS aircraft. Because space systems operate differently from airborne systems, those differences are explored. The organizations involved in space operations are also examined, along with their potential to effect the development of a space-based MTI system. The radar systems of both the AWACS and the JSTARS are described, as well as a few of the most prominent of the proposed space-based systems. The planning for space-based MTI is in its early phases. A 'Concept of Operations for Space-Based MTI' has been written, as has a 'Space-Based MTI Roadmap.' US Space Command has also written the Long Range Plan, which includes space-based MTI concepts in its plan for 2020. These plans are a good start but do not address...
