Reviews

This composed pdf is great. This can be for all those who statte that there was not a well worth looking at. I am just happy to explain how this is actually the finest pdf we have go through inside my own daily life and could be he greatest publication for ever.

(Conrad Heaney)

SALIVA AS A DIAGNOSTIC TOOL

LAP Lambert Academic Publishing Nov 2013, 2013. Taschenbuch. Book Condition: Neu. 220x150x5 mm. Neuware - 'Even though the saliva lacks the drama of blood, sincerity of sweat, emotions of tears saliva should be used as biomarker to detect pregnancy, diabetes mellitus, oral pre cancer & cancer, infectious diseases and also to catch the suspect by eliciting DNA from saliva over the bite marks in forensic odontology. This may allow a diagnosis of cancer to be made at an earlier stage, giving patients more choice in various treatment options. Doctors hope that, advancements in salivary diagnostics in the future will replace invasive biopsies and provide new avenues in early detection and diagnosis. It is a perfect medium for surveillance of health and disease. Saliva is ideal for screening premalignant and malignant oral neoplasms because of its anatomical proximity. Saliva contains specific biomarkers associated with either a healthy or diseased state'. 88 pp. Englisch.
