

Annual report of the New Jersey State Agricultural Experiment Station and the Annual report of the New Jersey Agricultural College Experiment Station Volume 42

By New Jersey Agricultural Stations

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 144 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1922 Excerpt: . . . began ripening their fruit more than 2 weeks ahead. We also find that the yield of the block plants as in nearly every instance been more than double that of the unblocked ones. The results obtained for the past 3 years are in my opinion easily explained. Any gardener at all familiar with the business will readily understand that a plant with a chunk of dirt 5 inches square filled with a mass of fine hair roots ready to go to work as soon as set in the field will easily out-grow and out-yield a plant that has been dug or pulled out with but a few roots and which is compelled to begin life all over again before it can get down to its life task of producing fruit, I am sending you a report of the tomato demonstration on my farm this year...
